

Steven Brown
Cabrini Grad Program
Melbourne

I am a current grad at Cabrini hospital in Melbourne and just wanted to email you my experiences within their program.

To be honest the program is terrible, there is no support no proper education or training grad nurses are expected to just hit the ground running. If it wasn't for some of the nurses on the ward who took the time to explain and educate I wouldn't have stayed in this program for as long as I have.

I totally back a review of grad programs as a whole especially in private hospitals because fellow grads in public hospitals seem to get more support

Thanks
Steven
