Review of Pharmacy Remuneration and Regulation
Australian Health Department

20/7/2017

Very disappointed that the King report has been used to distort Homoeopathic remedies to the point of recommending withdrawing them from Pharmacies in Australia.

I certainly hope that our elected representatives will not be fooled by the bias 'research' and have the sense to respect the communities proven desires to have a choice when it comes to health care.

My family have benefited from the use of Homoeopathic remedies and also from Pharmaceutical medicines, as both have a place in peoples health care.

Continued purchasing of Homoeopathic remedies through local Pharmacies also ensures that quality control via reputable companies is maintained.

Thank-you for your time.

Samantha Cherry
