

**Review of Pharmacy Remuneration and Regulation
#114_ANON-58KW-N5AP-3**

Response Submission to the King Review on Homeopathy

1. It was my belief that I live in a democratic country and thereby can choose for myself what I eat and take to determine my own wellbeing. I object strongly to having my choice taken away as to whether I take Homeopathy for myself and my family or not.
2. Homeopathy has worked exceptionally well for myself and my family for over 26 years and we are all very well. I do not want this choice to be taken away from me.
3. Homeopathy, whether 'you' believe it or not works AND has no side effects unlike many drug company medicines – which we are now hearing more about with regard to the reduced efficacy of antibiotics and antibiotics can have many side-effects. Homeopathics CAUSE NO HARM!
4. Homeopathy is respected in most Western Countries, especially throughout Europe, and should be respected as a choice in Australia, as a democratic country with liberal views on people's choice to look after themselves.
5. The very healthy Queen of England uses Homeopathy!
6. Why take Homeopathy off the Pharmacy shelf if it causes no harm? We already have it here in Australia so DON'T TAKE IT AWAY.
7. 'You' should be funding more research into the efficacy of Homeopathy as the King Review does not have any significant academic rigour or peer reviewed results.
8. Why not do a 'review' into the lack of choice and competition in the Therapeutic and Drug market AND the increasingly monopolized Pharmaceutical suppliers in the market. Is a Pharmaceutical Company behind the Sponsorship of the King Review?
