Review Secretariat
Review of Pharmacy Remuneration and Regulation
Australian Health Department

Dear Professor King, Bill Scott and Jo Watson

Homoeopathics are a safe treatment option for all Australians. Please do not remove them from Pharmacy, and please don't make our Society undemocratic!

I was shocked to read about the King Reviewing Interim Report, which is proposing to remove Homoeopathic Remedies from Pharmacies. I hear that non Homoeopaths Have tested the remedies and have found that there is nothing in them just alcohol or sugar pills, so what is the problem? How can they be harmful, if a child drank a whole bottle of pilules nothing would happen, with the remedy that is in alcohol then a few hours of sleep the child still would be ok because of the size of the bottle. Can we say the same for drugs, a child eats Panadol or drinks Panadol for Kids then the child would have to be hospitalised. Drugs have terrible side effects yet you're keeping them in the Pharmacy and harmless Homoeopathics are going???

What is the real reason for this maybe too many people are making free choices for their right to purchase and use medicines that they choose? So this is our Democracy Are you taking away our freedom!

I have used Homoeopathics on myself, my children, and my grandchildren, my Animals (they don't lie) and must say I would not be here for Homoeopathics. Whereas I have had terrible side effects from drugs.

I do not believe that homoeopathy has been properly and fairly and scientifically researched by Australian peak medical body the NHMRC. There were no Homoeopaths on their committee. There is a Dr [REDACTED] [REDACTED] who has done lots of research and documented, you should put him on the Committee and make it fair.

Yours sincerely
