

**Review of Pharmacy Remuneration and Regulation  
#171\_ANON-58KW-N5NP-G**

To Whom It May Concern

I feel that the Kings Review regarding Homoeopathy is an infringement on our rights to choose our own health care. The Australian population should have the right to choose the form of health care that best suits their individual needs without being forced to adopt allopathic medicine.

I am aware of many people who have benefitted from homoeopathic care that other forms of medicine had no answers for. It is safe and effective and should not be threatened by this review.

Yours sincerely
