

T10003

[REDACTED]

The changes to hours for gardening to 18 per year will not allow for the required work.

Currently receiving on my care plan 3 hrs per fortnight.

[REDACTED]

This area has brown snakes and paralysis ticks.

The tropics and wet season means grass grows very quickly and will soon get away if there is only one hour every three weeks.

Needs mowing weekly for six months of the year.

This certainly does not mean that the grandfathering of no net loss is applicable.

False advertising and extremely stressful.

Change my hours to what I currently receive.

Its an absolute travesty and will not assist in keeping me in my own home.

I understand the 17 percent wont be charged but there is no room in a pension for increased costs.

Who let this past?
