

T10013

Gardening concerns:

[REDACTED]

They spend a good majority of their time in the garden as this is now their main source of pride and still try to have a productive garden.

They still make raspberry jam, freeze their produce to eat off season and this keeps them active and engaged in life.

Limited gardening is effectively only going to allow for basic mowing fortnightly and rendering the garden unsafe.

[REDACTED]

Cleaning concerns:

Limiting cleaning is denying them to live as they please. As they choose to build a house to live in for the remainder of their lives. Their current cleaner does not clean every part of the house, only the rooms they use each week and the proposed restriction would not allow for proper cleaning.

The annual limits are presuming that everyone lives the same way and this is just not the case.
