

The allowable hours for cleaning and gardening is a mockery. This is a system that is to encourage people to continue living at home longer (dying even) .

Aged care facilities are already at capacity . This is an area that is imperative for hygiene and highly needed for the elderly. Saying no other aged group gets subsidies in this space is a redundant statement.

No other aged group are socially isolated and physically unable to do the work themselves (disabled aside ).

The current hcp is far better
